PRODUCT LEAFLET

Stand for VideoConferencing

INT.1030 VideoConferencing stand-trolley up to 50 inch incl. codec and camera platform

Videoconferencing is a set of interactive telecommunication techniques, which allows two locations to exchangeinformation at the same time (with vision and sound). This form of visual collaboration is used by companies to meet with their subsidiaries or international partners saving travel costs and time. For videoconferencing, the end-user is often looking for a mobile solution to which a single screen, a codec and a camera can be attached. The set would then be suitable for use in multiple rooms. SmartMetals has developed a wheeled stand, suitable for displays to 52 inch, with a codec and camera support. One of the following screen mounts should be added: 052.1000/.2000/.6000, which can be chosen based upon the weight and mounting pattern of the screen.

PRODUCT LEAFLET

Stand for VideoConferencing

Features

Minimal length: 1250 mm
Maximum length: 1600 mm (centre screen)
Weight: 67.00 kg
Colour: Dark-Grey & aluminium
